INFINITY

CrystalCable®

∞ INFINITY

The Power of Infinity

Power drives life. It drives movement. It drives every audio system in the world and is necessary to bring music "alive".

Power provides the energy behind every musical moment, from massive crescendos to the most subtle nuance.

The Crystal Cable Infinity power cord challenges the limitations of what is possible, applying ground-breaking precious metal technology and innovative construction to deliver pure, unconstrained, and undistorted power. The result is a cable resolving every detail, every dynamic contrast, and every emotion from the musical performance like never before. The Infinity power cord consists of nine coaxial conductors:

three each for positive, neutral, and ground. They are intricately woven into a perfectly symmetrical matrix that maintains absolute geometrical consistency. Such a construction resists induced RF distortion and keeps magnetic interference out of your system. All conductors are individually shielded to protect them mechanically and to offer additional protection from outside interference.

Each solid-core central conductor is drawn from the purest possible silver: a single infinite crystal, without boundaries and devoid of intrusive contaminants. It is then surrounded by two braided layers containing a mix of infinite silver and silver-gold alloy strands. This innovative and complex construction combines the benefits of solid and stranded conductors and our two most advanced metal formulations. Together, they create an ultra-low loss superconductor with almost zero resistance and a cable with vanishingly low source impedance.

For the past 20-years, the minimalist elegance of Crystal Cable has illuminated music and its honest reproduction through countless, wonderful sound systems.

The combination of grace and power have now culminated in the physical and musical beauty of the new Crystal Cable Infinity power cord.

With the Infinity power cords energizing your system, you'll experience what we can only describe as Infinite Performance: the lowest noise-floor, vivid tonal colors, vibrant instrumental textures, and life-like dynamics. It delivers climaxes that climb higher than ever before, with greater musical intensity and subtle inflections that shape the word or the weight of a note, and brings your listening experience to new emotional depths.

Music has an infinite power that "moves". Allow Crystal Cable Infinity to release the true power of your system.
